

SHARP

MX-C300W / MX-C250F
Digital Full Colour Multifunctional System

DESKTOP MFP WITH COMPACT
AND SMART DESIGN

You strive for efficiency. You hate waste. /This is Why you'll love these desktop MFPs.

Powerful, compact and affordable. **/This is Why** these MFPs are right for you.

The more successful you are, the more there is to do. And, somehow, there never seems to be enough time, money, people or space. Which is why, if you're looking for a new multifunction printer (MFP) you should take a close look at the Sharp MX-C300W or MX-C250F.

The two models are capable of printing and copying at speeds of either 30 or 25 pages per minute (ppm). And that's regardless of whether you're working with black & white or full colour documents. That's plenty of performance for any small workgroup and more than enough for personal use.

But print speeds are just one part of the productivity equation. That's why we've designed these MFPs to print and copy on both sides of the page automatically, saving you time and effort while reducing paper consumption.

A 50-sheet document feeder (35-sheet if you choose the MX-C250F) lets you scan as many as 9 full colour pages every minute at the full 600 x 600 dpi resolution. Just load your documents and let the MFP do its job while you get on with something else.

Fits where you want, does what you need

These MFPs are a great choice if you're short on space. Not only do they have a surprisingly compact design but you can increase the paper supply right the way up to 800 sheets without using more desk space.

Both models are equipped with a handy USB port for walk-up printing and scanning with a memory stick. And if you choose the MX-C300W, you can connect it to a wireless network and print wirelessly from your smartphone or tablet.

FRONT ACCESS USB PORT

CHOICE OF DOCUMENT FEEDERS

Resources are precious /This is Why we help you make the most of them.

The MX-C300W and MX-C250F are small in size and smart in design. Both come with an easy-to-read LCD control panel with programmable function keys, and their two-component development system delivers quality that's sure to impress.

Other useful features include full fax functionality (with PC-Fax and inbound routing for emailing faxes to their correct destination) and ID Card Copy.

ID Card Copy makes it easy to copy both sides of a card (such as an ID card or credit card, for example) on to a single page. It's convenient, and it saves you money.

Built-in security

If you're in a shared office you might want to control who can use your MFP. And you certainly don't want sensitive documents being left out in the open.

With User Authentication, we help you restrict access to authorised users who can 'unlock' the device by identifying themselves with a personal 5-digit security code.

For extra peace of mind, Sharp uses IPsec technology to encrypt data and to make sure that your system isn't communicating with any unidentified users.

Energy Efficiency

No one likes to waste energy. And that's another reason to put the Energy Star-certified MX-C300W and the MX-C250F at the top of your shopping list. For a start, their low power consumption and rapid warm-up times bring real savings.

They also have a special Toner Save Mode which reduces the amount of toner used for images and graphics without compromising the quality of the text. They even switch themselves off if you haven't used them for a set period of time.
